#### TOURNAMENT

## MONZA

New for 2008, the Monza undergoes a total construction rebuild. HO Skis presents Torsional Carbon Construction (TCC) technology, a new construction method with a carbon connection between the top and bottom laminates of the ski. TCC significantly increases the stiffness of the Monza's torsional flex pattern resulting in: increased cross-course speed with decreased skier effort, less down course "slip" than competitors' skis and increased "finish of the turn" stability. TCC also drastically reduces sheering between the top and bottom ski planes so your Monza retains 100% of its original flex for seasons of use. In addition, the new 2008 Monza has Athlete-tuned longitudinal flex patterns, so now you can ride the identical flex patterns as Will Asher or Wade Cox. From the industry's tightest tolerance machined Polyvinylchloride foam core, to the 100% carbon graphite construction, no details are overlooked in the creation of this thoroughbred. Handmade in Redmond, WA, USA.

#### Skill Level:

Expert through Pro Competition

Sizes: 63.5", 65", 66", 67", 68", 69.5"

#### Boot Options:

- Double Approaches
- Double Animals
- Animal with RTP/ Floating RTP

## TOURNAMENT

# SYSTEM 8

A more forgiving alternative to the top-of-the-line Monza, the System 8 is built out of the same Monza molds' and shares many of the new Monza features including Torsional Carbon Construction and Athlete-tuned longitudinal flex patterns. The System 8's distinguishing features are its polyurethane core and new specifically designed Controlled Rebound Technology (CRT), found exclusively on the 2008 System 8. CRT increases a ski's dampening characteristics through a unique blended lay-up process. By controlling the rate at which the ski rebounds we have increased the overall ski stability, predictability and consistency, especially at the finish of the turn. You will feel the sensation that the ski is riding deep and powerful at the turn finish. As a result, the 2008 System 8 excels in a wide range of water conditions and is designed for advanced skiers who prefer a smoother, slightly rounder turn finish and ski into more angle as they approach the wakes. Handmade in Redmond, WA, USA.

### Skill Level:

Advanced through Pro Competition

Sizes: 63.5", 65", 66", 67", 68", 69.5"

### Boot Options:

- Double Approaches
- Double Animals
- Animal with RTP/ Floating RTP

## PERFORMANCE

# NITRO

The Nitro, the newest ski in the HO line, is built off of the Monza/System 8 platform. This ski, with its slightly increased surface area, provides optimum skiing at speeds up to 34 mph. The 3.75% increase in total ski surface area provides support at the finish of the turn where traditionally shaped skis get "bogged" down. Now you can ski the course efficiently with less physical effort and overall body fatigue. Make it easy on yourself and pick up a Nitro.

### Skill Level:

Performance through Expert

Sizes: 65", 67" and 69"

### Boot Options:

- Double Approaches
- Double Animals
- Animal with RTP/ Floating RTP
- Double Venoms
- Venom with RTP/ Floating RTP

**PERFORMANCE**

## TRIUMPH

This high performance ski series was designed with increased surface area to provide optimum skiing performance at speeds up to 32 mph. The 3-stage rocker pattern, small bevels and shaped sidecut (based off the Monza platform) allow this ski to feel equally at home in and out of the slalom course. Look for competitors ripping up the lake on the Triumph series of skis in the wide-ride division of the INT Nationals.

**Skill Level:**

Performance through Expert

**Sizes:** 65", 67, 69 and 71"

**Boot Options:**

- Double Venoms
- Venom with RTP/ Floating RTP
- Double Shock
- Shock with RTP/ Floating RTP

**PERFORMANCE**

## COMP FREERIDE

Whether learning to get up on one ski for the first time or enjoying an early morning set with friends, the Comp Freeride Series has the ski for you. Its deep-V bottom design makes this series a stable platform for improving your skills. Sharp bevels and a pronounced inside-radius sidecut provide the performance you've come to expect from an HO ski. User friendly design and a sophisticated graphic make the Comp Freeride Series a favorite among skiers everywhere.

**Skill Level:**

Beginner through Intermediate

**Sizes:**

65" Venture, 67" Burner, 69" Charger and 71" Magnum

**Boot Options:**

- Double Venoms
- Venom with RTP/ Floating RTP
- Double Shock
- Shock with RTP/ Floating RTP

**WOMENS**

**SIREN**

When you hit the water, you want to determine your own path. Jump on the lady's version of the Triumph and do just that. The Siren has added surface area to keep the ski riding light in the water, but with just the right amount of stability to allow you to push your skill to the limit.

**Skill Level:**

Performance through Expert

**Sizes:** 63", 65"

**Boot Options:**

- Double Venoms
- Venom with RTP/ Floating RTP
- Double Shock
- Shock with RTP/ Floating RTP

**WOMENS**

## ESPRIT

Raise your ability to the next level with the easy riding Esprit. The tunnel bottom lends stable, consistent acceleration ending in slow controlled turns. This sister to the Mach 1 is made with a softer flex for a forgiving ride at any level.

**Skill Level:**  
Recreational through Expert  
**Sizes:** 64", 66"

- Boot Options:**
- Double Venoms
  - Venom with RTP/ Floating RTP
  - Double Shock
  - Shock with RTP/ Floating RTP

**X-FACTOR**

**REVOLT**

The Revolt was designed for the aspiring world champion. The HO Syndicate team wanted a legit slalom for smaller riders so they insisted on the same mold and construction as the System-8. The Revolt is built for groms who need a performance ski that can handle what the stars of tomorrow can dish out.

**Skill Level:**

Recreational through Competition  
 Size: 63.5"

**Boot Options:**

- Double Approaches
- Double Animals
- Animal with RTP/ Floating RTP
- Double Venoms
- Venom with RTP/ Floating RTP
- Double Shock
- Shock with RTP/ Floating RTP

**X-FACTOR**

**JUDGE**

When it's time to get your future pro behind the boat, step them into a ski that parallels construction to their big brother's, but is a versatile and affordable entry level ride. A slightly wider tail lends improved balance, inspiring confidence and control for your junior to discover every shoreline and cove on the lake.

**Skill Level:**

Recreational through Expert  
 Size: 61"

**Boot Options:**

- Double Venoms
- Venom with RTP/ Floating RTP
- Double Shock
- Shock with RTP/ Floating RTP

**RECREATIONAL**

## MACH 1

The classic has returned for another year. The traditional tunnel bottom ski has been updated with slightly sharper Monza bevels and a 3-stage rockerline. The Mach 1 is designed for skiers who love the old-school feeling at an old-school price.

**Skill Level:**

Recreational through Expert

**Sizes:** 66", 68" and 70"

**Boot Options:**

- Double Venoms
- Venom with RTP/ Floating RTP
- Double Shock
- Shock with RTP/ Floating RTP

**RECREATIONAL**

## RIVAL

Whether you're just learning your deep-water start or enjoying a relaxed slalom ride around the lake on your summer vacation, this is the ski for you. The wide dimension of this ski makes learning to get up behind the boat a breeze, while the deep-V bottom design makes cutting across the wakes smooth and stable. Skiing has never been easier now that you've met your Rival.

**Skill Level:**

Recreational through Performance

**Sizes:** 66.5", 68.5"

**Boot Options:**

- Double Venoms
- Venom with RTP/ Floating RTP
- Double Shock
- Shock with RTP/ Floating RTP

**RECREATIONAL**

## IMPACT

This ski is a "best buy" in terms of price and performance. Created from the technology we use in our high-end slalom skis, the Impact retails for hundreds less. The Impact has a smooth, forgiving flex pattern with great edge hold for increased control and stability. The Impact is the perfect ski for taking your slalom skills to the next level.

**Skill Level:**

Recreational

**Size:** 67"

**Boot Options:**

Shock with Floating RTPS

**CONVERTABLE COMBO**

## PINNACLE

The world's first convertible combo skis. Developed from the Comp Freeride Series of skis, these high performance combos allow you to adjust the HO Shock bindings up to one inch fore and aft on the skis. Push the bindings all the way forward to lay down some fat two-ski curves, and push them back when it's time for your slalom ride. Now you can have the best of both worlds with this pair of skis.

**Size:** 67"

**Boots:** Shock with Floating RTS

**COMBO**

## BLAST

For 40 years enthusiasts have been introduced to the sport of waterskiing in unsupportive uncomfortable "horseshoe bindings." Well not anymore, HO introduces the most revolutionary combo water ski boot since the horseshoe and it comes standard on Blast Combos. A fully adjustable floating tongue design for improved comfort and fit, slipping into the Eclipse combo boots is like slipping into a glove. Finishing touches include elastic ankle retention strap and an elastic forefoot cover for a clean new look. The combination of the new Eclipse boot on already cutting-edge Blast ski shape makes the Blast Combos the most innovative combos in the industry.

**Sizes:**

59" skiers up to 120 lbs. (55 kgs.)

63" skiers 70-150 lbs. (32-68 kgs.)

67" skiers 110 and up (50 kgs. and up)

**Boot Options:**

Helix with Floating RTS

Eclipse with Floating RTS

**COMBO**

## EXCEL

The story for 2008 is combo boots. The innovative Helix boot has been totally redesigned with an improved forward lean, new forefoot pull tab for easier "in-water" entry and wider profile to accommodate larger foot sizes. But the big news is the Helix boot comes standard on Excel combos. The Excel combos with their tunnel bottom design channel water and lend a solid platform for an oversized place to stand. Flex enhancing bars inside the skis get them to plane quickly and hold speed so they don't drag behind. Excels are a great pair of starter skis for everyone in the boat and with the addition of the improved Helix boots will blow the competition out of the water.

**Sizes:**

59" skiers up to 120 lbs. (55 kgs.)  
 63" skiers 70-150 lbs. (32-68 kgs.)  
 67" skiers 110 and up (50 kgs. and up)

**Binding options:**

Helix with RTS

**COMBO**

## HOT SHOT TRAINERS

The Hot Shots are the answer for teaching your small children to ski the easy way. The stabilizer bar holds the skis steady and the correct distance apart to ensure control and confidence when learning. As your little skier progresses, the bar can be removed providing more freedom. The wide tail shape in the Hot Shots allows the skis to plane easier providing stability on the water. A "how to" DVD is included featuring the steps and suggested use of the skis. Also included is our special tow rope that places the child in the proper ski position. Handles at both ends keep you in control of your child's ski ride from start to finish.

**Size:** For children up to 60 lbs. (27 kgs.)

## TAIL WEIGHTS

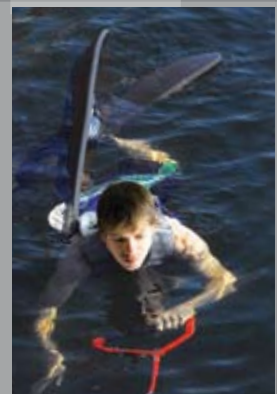

Starting your on the water adventure can be an exciting yet challenging time at the lake. We have developed all the accessories necessary to make your learning experience become a fail-proof day. The first addition to your combos is HO's Stabilizer-bar, which is an option on the 63" and 67" pairs (standard on all 59"). Using the Stabilizer-bar will stop the skis from migrating away from each other on deep water starts. This is the initial step in gaining confidence when trying to get out of the water for the first time. It is easily attached or removed with thumb screws. Our second addition is HO's Tail Weighting System. Placing Tail Weights over the fin area eliminates their buoyancy, thus taking away the frustration of "floundering around" in the water and expelling energy before the slack is out of the rope. Tail Weights will also make the skis more stable while on top of the water during the opening days of skiing. Both of our combo additions function without effort, and if used properly will get your students on top of the water faster, with less anxiety.

WITH TAILWEIGHTS

WITHOUT TAILWEIGHTS

# WAKESKIS

Symmetrical freestyle WakeSkis designed for multi-directional riding on wake, rails and winch. The natural extension of the snowsports freestyle revolution brought to the liquid medium. The trick possibilities are endless with an ultra-progressive, 145cm Greg Nelsen Designed shape. A continuous 2.25" rocker and first ever kick tips ensure you'll get the maximum pop off any wake. Arced base channels (that actually curve in at the tips) allow the skis to naturally carve up the wake. Small fins at both ends make riding switch a breeze and each ski has a soft landing spine beneath the footbed for butter smooth landings. With tricks evolving daily, why not pick up some WakeSkis and take the step from player to pioneer.

**TOP ROW** **APPROACH** Sizes: XS, S, M, L, XL, XXL

- Features:**
- Hybrid boot design with maximum lateral stability
  - Ankle wrapping Lateralus Heel Piece
  - Front-lace entry system
  - Anatomic interchangeable footbeds
  - 22° forward lean

**ANIMAL** Sizes: XS, S, M, L, XL, XXL

- Features:**
- Layered overlay construction
  - Stronger, thinner TPU material with embossed synthetic leather
  - Specifically placed overlay stretch zones for less foot cramping
  - High density EVA toe and heel pieces
  - Anatomic interchangeable footbeds

**VENOM** Sizes: XS, S, M, L, XL, XXL

- Features:**
- Soft EVA toe and heel pieces
  - Layered overlay construction
  - Stronger, thinner TPU material with embossed synthetic leather
  - Specifically placed overlay stretch zones for less foot cramping

**BOTTOM ROW** **SHOCK** Sizes: Mini, Standard, XL

- Features:**
- Effortless, front lacing entry system
  - New preformed EVA floating tongue
  - Soft, plush universal footbed for long comfortable ski rides

**HELIX**

- Features:**
- Updated Helix boots come standard on Excel Combos
  - Improved forward lean
  - New forefoot pull tab for easier entry in water
  - Increased foot volume fits larger, wider feet more comfortably

**ECLIPSE**

- Features:**
- Revolutionary new Eclipse boot comes standard on Blast Combos
  - New floating tongue design:
  - Increased comfort
  - Improved fit for all foot sizes
  - New forefoot stretch panel for clean aesthetics
  - Elastic ankle retention strap
  - Increased foot volume fits larger, wider feet more comfortably

**RTP** Sizes: XXS, XS, S, M, L, XL, XXL

- Features:**
- Individually-sized rear toe overlay
  - Anatomical contoured footbed
  - Standard rear Pivot Plate

**FLOATING RTP** Sizes: One size fits all

- Features:**
- Proven RTP EVA cut pattern
  - New lycra floating tongue
  - New large Velcro tensioning strap:
  - Adjust floating tongue height
  - Set foot volume size
  - Anatomical contoured footbed
  - New PVC patch adorns the tensioning strap

# KNEEBOARDS

## JOKER

### Features:

- Symmetrical compression molded design
- Thinner profile for advanced performance
- Unique flow channels in tip
- 30 degree bottom rails for edge holding power
- Quad-density molded pad
- HO's double locking strap

## ELEMENT

### Features:

- Symmetrical compression molded design
- Hard rails for deeper edge control
- True straight channels for positive tracking
- Tri-density molded pad
- HO's Fully adjustable single locking Comfort-Strap
- Great design for all levels of riding

## PROTON

**Features:**

- High-End advanced twin-tip design
- Innovative step down rail for more consistent ride
- 20 degree bottom rails for superior control
- Thin profile combined with continuous rocker for maximum performance at any rider level
- HO's exclusive Dual-Option retractable fin system
- HO's exclusive Easy-Start system (pop up handle holder)
- Larger orthotic pad for comfortable ride
- Double padded molded EVA belt

## NEUTRON

**Features:**

- Continuous rocker with dual radius sidecut for easy tricks and soft landing
- 4 molded in fins for advanced control
- HO's exclusive Easy-Start system (pop up handle holder)
- Larger orthotic pad for comfortable ride
- HO's Fully adjustable single locking Comfort-Strap

## ELECTRON

**Features:**

- Twin tip design with step down rail for consistent ride
- Symmetrical side cut for maximum performance
- Molded in fins for maximum control
- Larger orthotic pad for comfortable ride
- HO's single locking strap
- Best board for beginners to intermediate riders
- HO's exclusive Easy-Start system (pop up handle holder)

**VEST**

### POINT

This competition pullover is made of 100% 4 way stretch material. Strategically placed foam panels allow for maximum range of motion... You won't even know you've got it on.

- Made of 100% 4 way stretch material
- Light weight pullover allows maximum mobility
- Elastic drawstring at bottom with loop for boardshort attachment

Colors: Black  
Sizes: S – XXL

### SYSTEM

The vest of choice for top skiers everywhere! 4-panel construction allows for superior range of motion and conforming fit. The segmented foam placement provides flexibility where needed .

- USCG Approved Type III Personal Floatation Device
- 4 Panel Construction
- Segmented Foam Panels
- Independent Segmented Rib Panel
- 2 – concealed 1.5" belts

Colors: Black/Red  
Sizes: S – XXL

## VEST SIZING (CHEST SIZE IN INCHES)

### FLEX

The Flex vest is a 3-dimensional creation built for enthusiasts wanting comfort and freedom of movement. Oversized armholes and 3-independent flex zones in the chest will maximize range of motion, while maintaining Coast Guard approval. Asymmetrical graphics accent the fit of this vest.

- USCG Approved Type III
- Thinner foam in the upper chest
- Thicker foam in the lower section
- 2 – 1.5" concealed belts

Color: Black/Blue  
 Sizes: S – XXL

### MENS PURSUIT

Traditional 2 panel full body neoprene design fits most body types. Our most affordable neoprene vest with wider arm holes and a 1.5mm Neoprene shell make this a comfy vest.

- USCG Approved Type III Personal Floatation Device
- Mesh Bottom Drains
- 2 – 1.5" concealed belts
- Heavy Duty Zipper

Colors: Black/Red or Black/Blue  
 Sizes: S – XXL

## WOMEN'S FORM FIT

The design premise behind this vest was to create a unique fit, specifically for a woman's shape. Features like the formed chest "cups" and one piece wrap-around foam have made this a reality. Both elements give the Form Fit support and protection exclusively for the woman on the water.

- USCG Approved Type III
- Designed specifically for a woman's shape
- 2 – 1.5" wide belts
- Mesh bottom drains

Colors: Black/Pink or Blue/Lt. Blue  
 Sizes: XS – XL

## WOMEN'S PURSUIT

Same notable characteristics as the Men's version with a fit for a woman's torso.

- USCG Approved Type III
- 2mm neoprene outer shell
- 2 – 1.5" wide belts
- Mesh bottom drains

Color: Blue/Purple  
 Sizes: XS – L

Color: Royal Blue/Black  
 Sizes: XS – L

## GIRLS YOUTH PURSUIT

Excellent flotation for all sizes - Scaled down versions of our adult vests for the next generation rippers.

- USCG Approved Type III
- 2mm neoprene outer shell
- 2 – 1.5" wide belts
- Heavy-duty zipper

Color: Black/Red  
 Fits: 50 - 90 lbs.

### TEEN PURSUIT

Scaled versions of the Adult Pursuit vests, for our next generation to get started early on the water.

- USCG Approved Type III
- 2mm neoprene outer shell
- 2 – 1.5” wide belts
- Heavy-duty zipper
- Fits chest size: 28”-32”

Colors: Black/Blue  
Fits: 50 - 90 lbs.

### BOYS YOUTH PURSUIT

- USCG Approved Type III
- 2mm neoprene outer shell
- 2 – 1” wide belts
- Heavy-duty zipper

Fits: 50-90 lbs  
Color: Red/Grey

### CHILD PURSUIT

Excellent flotation for all sizes -Scaled down versions of our adult vests for the next generation rippers.

- 2 – 1” wide belts
- USCG Approved Type III
- 2mm neoprene outer shell
- Heavy-duty zipper

Colors: Black/Blue  
Fits: 30 - 50 lbs.

### TODDLER PURSUIT

Excellent flotation for all sizes -Scaled down versions of our adult vests for the next generation rippers.

- USCG Approved Type II
- 2mm neoprene outer shell
- 2 - 1” wide belts
- Adjustable crotch strap
- Heavy-duty zipper
- Nylon Shell

Colors: Black/Blue  
Fits: 0 - 30 lbs.

### MENS INFINITE

Our essential vest series for your all-around use. The lightweight nylon dries fast and is super durable.

- USCG Approved Type III
- 4 – 1.5” Belts
- Full Length coverage
- Nylon Shell
- Release cord attachment

Colors: Black/Red or Black/Navy

Sizes: XS – 5X

### MENS UNIVERSAL

Our recreational designed vests will keep you on the water soaking up the sun without putting a hole in your wallet.

- USCG Approved Type III
- 3 – 1.5” Belts
- Nylon Shell

Colors: Black, Yellow, Red and Blue

Sizes: S/M, L/XL, SXL

### WOMEN'S INFINITE

Our essential vest series for your all-around use. The lightweight nylon dries fast and is super durable.

- 4 – 1” Belts
- Full Length coverage
- USCG Approved Type III
- Nylon Shell
- Release cord attachment

Color: Black/Purple

Sizes: XS – L

### WOMENS UNIVERSAL

Our recreational designed vests will keep you on the water soaking up the sun without putting a hole in your wallet.

- USCG Approved Type III
- 3 – 1.5” Belts
- Nylon Shell

Color: Black/Blue

Sizes: S/M, L/XL

### YOUTH INFINITE

- 3 - 1” wide Belts
- USCG Approved Type III
- Nylon Shell
- Release cord attachment

Color: Blue/Black

Fits: 50 – 90 lbs.

### CHILD INFINITE

- USCG Approved Type III
- 2 - 1” wide Belts
- Adjustable crotch strap
- Nylon Shell

Color: Blue/Black

Fits: 30 – 50 lbs.

### TODDLER INFINITE

- USCG Approved Type II
- 1 - 1” wide Belt
- Adjustable crotch strap
- Heavy-duty zipper
- Fleece lined neck
- Nylon Shell

Color: Red

Fits: 0 - 30 lbs.

# GLOVES

## 41 TAIL SIZES XS - XXL

The ever popular HO RPM glove has been given a makeover for 2008. The glove of choice by top skiers everywhere is now called the 41 Tail. With high end materials and manufacturing processes such as tone on tone screening, leather embossing and suede you're sure to clear that 41 off pass. Kevlar Palm.

## SIREN SIZES XXS - L

HO's Pro ladies approved the size and shape of this all new glove for 2008. The Siren was designed with hi-end performance and comfort in mind. With a cut designed alongside the pro men's gloves, but for a woman's fit, the Siren is the glove of choice for the aggressive female skiers. Kevlar Palm.

## TACTION SIZES XS - XXL

New for 2008 is Will Asher's signature Taction glove. Features include silicone printing, heat stamping, high frequency printing, the new Will Asher logo and his World Champion ring. The clean look of this glove is sure to turn heads on the lake. Double padded Amara palm.

## ESPRIT SIZES XS - L

Re-designed for 2008 with the ever popular Velcro strap on the back of the palm, the esprit is back in two styles. Choose between full finger and 3/4 length, both with pre-curve. The palm style follows the Empire glove, using double-back padded palm and sticky bumps over upgraded Amara.

---

## **EMPIRE** SIZES XS - XXL

---

The Empire has changed for 2008 and now includes the popular Velcro strap on the back of the palm. A double-back padded palm with sticky bumps over upgraded amara as well as unique sew lines and pre-curved fingers makes this one of the best fitting gloves ever designed. Amara palm.

---

## **ESPRIT 3/4** SIZES XS - L

---

Re-designed for 2008 with the ever popular Velcro strap on the back of the palm, the esprit is back in two styles. Choose between full finger and 3/4 length, both with pre-curve. The palm style follows the Empire glove, using double-back padded palm and sticky bumps over upgraded Amara.

---

## **CLUTCH** SIZES XS - XXL

---

With only three finger pockets and a dowel at the end of the middle pocket, you can get a huge grip on the handle. An internal strap transfers the pull to the wrist and allows the skier to relax their grip. Hold onto huge pulls out of the turn, or extend your ski ride with the glove that makes it easier to hold onto the handle. Kevlar Palm

---

## **X-FACTOR** SIZES XS - M

---

Back by popular demand, HO presents the X Factor. Pre-curved fingers and X Factor series graphics make this the glove of choice for any groom. Amara palm.

# INFLATABLES

Here at HO we pride ourselves on creating premium products for watersports enthusiasts of all ages and abilities. We are constantly taking steps to provide the most enjoyable towable experience on the water and the 2008 HO inflatable line is no exception. We've updated the graphics on several of our most popular tubes from the Formula 3 to the Duo and even the Typhoon. As if that wasn't enough, we've continued improving our patented Sphere Technology tubes and created a few other unique products as well! So whether you are looking for a tube for the whole family, a tube to push the limits of extreme riding or just a tube for a leisurely cruise, look no further than the next couple pages!

## SPHERE TECHNOLOGY

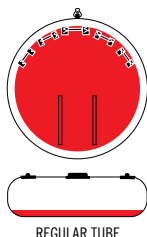

### PROBLEM:

As towables get larger the surface area touching the water increases. Increased contact creates more drag as the water runs over a larger surface. Increased drag requires more energy to whip the tube behind the boat and causes a slower, less exciting ride. Therefore, in general, most larger tubes, a) are less lively, b) are harder to whip, c) require more energy to tow, and d) cause more strain on the boat.

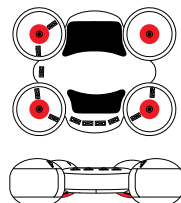

TUBE SURFACE AREA CONTACTING WATER

### SOLUTION:

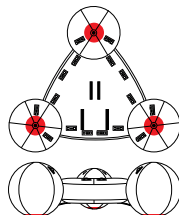

HO Sphere Technology™ Given this problem, designing large tubes in the past has generally meant simply creating a larger version of a smaller existing tube. Patented HO Sphere Technology™, however, is something completely new. The problem of drag is solved by actually reducing the surface area contacting the water. This is apparent in the HO Molecule™. The Molecule™ is comprised of three large spheres arrayed at the vertices of the triangular deck. The key to the design is the deck being suspended off the water. Thus, the only surface area which contacts the water is the very lowest portion of the spheres, while the remainder of the body of the towable skims along above the water. The results include: a) more lively ride, b) large size, yet easy to whip, c) less energy required to tow, and d) less strain on the boat. Unsurpassed shock absorption makes the HO Sphere Technology™ tubes the best in the world for rough and open water!

BLACK ICE

## PRODUCT FEATURES

### NEOPRENE PADDING

Neoprene is used to increase the comfort of the ride.

### TUBE WEIGHT (LBS)

Exact tube weight (dry, uninflated at sea level, give or take a few ounces)

### PVC BLADDER GAUGE

30 gauge PVC designates the highest quality, highest durability bladder material used in the towable industry. All PVC used in HO products is pure virgin vinyl.

### NEW QUICKFILL VALVE

A user friendly, high-capacity valve with no cap to unscrew, or lose.

### NUMBER OF BOSTON VALVES

A Boston valve is the standard high-capacity valve used on all our upper-end inflatables. (Helpful Hint: Make sure they're tight! Screw 'em in all the way, and thread 'em correctly)

### TARPAULIN

A durable, super slick material used on the base of some of our tubes to increase speed while reducing drag.

### MAXIMUM NUMBER OF RIDERS

### NUMBER OF STEM VALVES

A stem valve is the small, one-piece valve that everyone used as a kid to blow up a beach ball.

### QUICK TOW ATTACHMENT

This allows you to quickly attach the tow-rope to the tube.

### NUMBER OF CUP HOLDERS

Expertly located to maximize drink accessibility.

### ONE YEAR WARRANTY

The longest in the industry

### NYLON DENIER WEIGHT

The denier weight of nylon refers to the size of the yarn used in the weave of the material. 420 denier nylon is used for smaller and entry-level towables. 840 denier nylon is the strongest and highest quality material used to reinforce our largest and toughest towables.

**ION**

**96" X 108"**

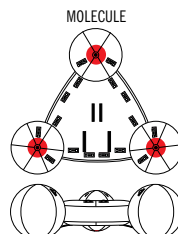

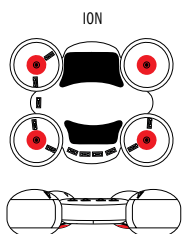

Behold the latest addition to the HO Sphere Tech line of tubes, the monstrous ION! Never before has a tube this large been possible without placing incredible strain on your boat. The 4-person Ion uses HO's Sphere Technology to suspend the deck of the tube off the water leaving the spheres as the sole point of contact. This dramatically reduces surface area on the water making the ION the fastest big tube out there. That's not all. The new four ball design takes the rider's weight and distributes that force equally over the entire tube resulting in a tube that is more stable and less likely to sag in the center. With sphere tech tubes taking over the waterways, get yours fast before you're left out in the cold.

**MOLECULE**

**128" X 132"**

The Molecule, the tube that started the Sphere-Tech revolution, uses the latest and most innovative technology in inflatables to perform like no other tube has ever dreamed! Its innovative, patented design isn't just for looks. Using HO Sphere Technology™ the center platform is suspended above the water with only the spheres contacting the surface.

This dramatically lowers the surface contact and drag behind the boat. The result is an extremely quick sliding, large tube that works equally well on rough and smooth water. There are tons of handles, two towing orientations, and the riding positions are only limited by your own imagination.

TUBE SURFACE AREA CONTACTING WATER

TUBE SURFACE AREA CONTACTING WATER

**ATOM**

**90" X 96"**

Introducing the new Atom! The Atom utilizes HO's Sphere Technology in the proven three ball configuration like that of the Molecule. Hold on to your spheres because the Atom is a rocket on the water. Its smaller 2-person size combined with the suspended deck and low surface area contact make the Atom incredibly fast and allow for unmatched speed on whips. Tow from the front sphere or from the side of the deck to get a totally different ride!

**BLACK ICE**

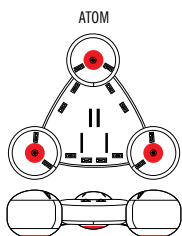

**78" DIAMETER**

Knowing that smaller surface contact with the water means a faster sliding tube, we created the first convex shaped tube – The Black Ice. This exclusive convex shape allows a small contact surface on bottom and a 78 inch diameter riding surface on top!

So, even when piled with three people, the Black Ice still skims effortlessly across the wake. The convex shape also allows riders more interaction; they can lean into turns as they speed across the wakes!

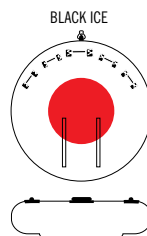

The Black Ice reduces surface contact with the water by its convex shape. This smaller contact results in a much quicker sliding tube, while not reducing the number of possible riders.

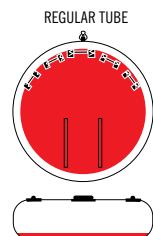

TUBE SURFACE AREA CONTACTING WATER

TUBE SURFACE AREA CONTACTING WATER

■

**TRIO**

**80" X 75"**

If two is better than one, than three is a party on the water! New for 2007, the Trio is a 3-person tube sharing many of the same characteristics of the Duo. A great value for a great tube. Call two of your friends and get the fun started!

**DUO**

**81" X 51"**

The Duo is a great value and an awesome two person tube. It can be towed in two different orientations - with the riders side-by-side, or one in front of the other - both ways work great. The center holes are round, so they are equally comfortable in both directions. The Duo is an easy call when looking for fun and value - Two is definitely more fun than one!

**HORNET**

**54" DIAMETER**

The Hornet is an HO classic! It's an incredible ride with its neoprene knuckle guards and soft foam filled handles. Its heavy duty PVC vinyl bladder and durable 420 denier nylon cover allow aggressive use! This is a great introduction to tubing!

**DIAMOND BACK**

**58" X 58"**

The Diamond Back's shape provides excellent stability side-to-side. When leaning to the side the rider is supported by a stable riding platform created by the corner of the diamond. This gives the rider more stability in the whip and landing off the wake.

**TREK**

**52" X 47"**

The Trek's unique shape looks great and also performs better than the traditional round tube. Its extended rear corners act to stabilize the tube during fast whips and high launches off the wake. The Trek offers a better shape and better performance at a great price!

**DOUBLE SHOT**

**52" X 56"**

The HO Double Shot. Sit two people side by side in couch-like position, grab hold of the soft foam handles and get ready for a thrill ride in luxury. This towable is stable enough to withstand the whip, and you'll always feel secure with the tall side bolsters. Made of the finest quality materials such as 30 gauge PVC bladders and an 840 denier nylon cover, the Double Shot is sure to provide seasons of fun. With built-in cup holders and its natural couch shape, this tube easily doubles as your favorite place to relax. The Double Shot is the tube of choice for kids and the whole family.

**TRIPLE SHOT**

**78" X 56"**

The big brother to our popular Double Shot, the Triple Shot accommodates 1, 2 or 3 riders. Sit down, grab a hold of the soft foam handles and get ready for the ride. This towable is stable enough to withstand the whip, but capable of a big thrill ride. The Triple Shot is the tube of choice for kids and the whole family. Made of the finest quality materials such as 30 gauge PVC bladders and an 840 denier nylon cover, the Triple Shot is sure to provide seasons of fun. With built-in cup holders and a natural couch shape, this tube easily doubles as your favorite place to relax.

**EXTREME**

**75" X 75"**

The Exteme is a proven performer. As one of our best selling tubes, it remains a great value and a ton of fun. You will appreciate the full knee and elbow neoprene padding, superior durability and easy inflation. Pile on three full sized adults and enjoy the ride!

**BOMBER**

**72" DIAMETER**

The Bomber features a unique baffle construction which allows it to slide very quickly behind the boat. And its front-to-back taper makes it really easy to get back on. The Bomber makes a great multi-rider tube for up to 3 adults, or an aggressive single rider thrill ride!

**SOLO-X 64" X 60"**

The Solo X is a nimble, two person deck-style tube that excels as an aggressive ride for tackling big airs and quick whips. Riders lay on their stomachs and are supported in the turns by the inflatable side bolsters. The Solo X will last for seasons!

**DRAGON 64" X 60"**

The Dragon shares the same construction as the Solo-X, and features great bold graphics. New in 2008 the Dragon features our tarpaulin bottom for added durability and extra speed.

**ROCKIN' ROLL 81" X 51"**

If you think you've done it all, then this is the tube for you! The curved shape of the Rockin' Roll allows you unlimited maneuverability from side-to-side. Roll it on its side and the pontoon digs in and pulls the tube in that direction. A single rider gets the performance ride; ride with two and be entertained as they hang on and try to cooperate and direct the tube!

**SLIDER 51" X 25"**

On the Slider nothing stands between you and the action. We started with a small body-board style deck and added flexible side wing bolsters for added control and support. What we ended up with is one of the most exciting rides on the water. And for the price you can definitely afford to give it a try!

**FORMULA 3**

94" X 90"

The Formula 3 is a fully covered 3 person ride! Its low center of gravity and squared off back keep it stable in the turns, and webbing covered, soft foam handles and inflatable seats provide a comfortable ride while you and two friends whip around the lake!

**FORMULA 2**

72.5" X 75"

Since its introduction several years ago, the Formula 2 has been one of our most popular tubes. The squared off back of the Formula 2 helps provide stability in fun whips. It's also a comfortable and secure ride for the kids. The backrests and inflatable floors offer tons of comfort. This is a favorite shape for good reason!

**3XS**

**72" DIAMETER**

The 3XS is super-sized to 72". It's designed with an extra large center riding area with inflatable floor. This tube excels when filled with smiling kids. With six handles, plenty of riding space, and a low center of gravity there isn't much you can't do in this tube.

**TYPHOON**

**66" DIAMETER**

The Typhoon is a large 66" D-shape tube. The "D" shape provides more stability than a regular round tube, and its oversized center with comfortable inflatable floor works great for both kneeling and sitting. This tube is big enough for a couple of adults or several kids.

**2XS**

**60" DIAMETER**

The 2XS is the ultimate round tube. Its inflatable floor smoothes out the bumps and provides a comfortable ride. Other premium features include neoprene knuckle guards, Boston valve, and Quick Tow Attachment.

**ZIPPER**

**56" DIAMETER**

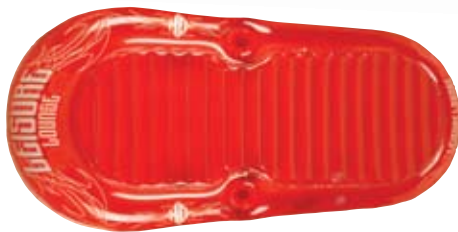

The Zipper is fully covered and performs great for exciting whips and big airs off the wake or casual rides behind the boat. Its comfortable and durable soft foam filled handles will keep you riding for hours, and the Boston valve will provide quick and easy inflation and deflation so you don't have to waste time off the water.

### CASTAWAY ISLAND

Inflate, hop aboard, and cast away! Anchor in water up to 30 feet deep! The Castaway Island is the perfect hub for all your water sports activities. The Island is newly redesigned to include four built-in backrests with head cushions. Also new for '08 is a rectangular center cut out – use it for boarding the island or floating a standard sized cooler filled with your favorite beverages. The included Link Lanyard allows you to connect any '08 HO inflatable to the Island. Make the Island your all-day base! It's perfect for pick-up/drop-off or just relaxing in the sun. With the Castaway Island, the choice is yours!

### LEISURE LOUNGE

The Leisure Lounge is an improved version of the classic floating mattress. It features two cup holders and a super comfortable, stable, and durable construction. Use the included HO Link Lanyard to attach to the Castaway Island or any of our other HO inflatables and you're set for relaxation with no worries!

### TIKI LOUNGE

It's impossible not to relax in the Tiki Lounge. This simple design is durable and considerate. You will enjoy the relaxed posture and the two cup holders that keep your drinks within reach, but out of your way. These great features will help you stay put ... but you won't want to go anywhere anyway.

### SUNSEEKER

The brother to the Tiki Lounge, the Sunseeker is the next generation in HO lounging inflatables. While sharing the same comfortable backrest, head cushions and cup holders as the Tiki Lounge, the Sunseeker establishes its own identity with the addition of a personal cooler (included) that stays out of the way but never out of reach. A hollow center puts you in contact with the water!

### SUNSWING

The Sun Swing excels on scalding summer days and puts you where you want to be - in the water! Its design is simple and durable, and allows you to determine how wet you want to be. With two cup holders you will be sure to stay refreshed inside and out, and the included Link Lanyard will assure you stay close to the action.

**12 VOLT HIGH VOLTAGE PUMP**

This High Volume Inflator is sure to fill your tubes as fast as you want. This inflator pumps out a massive 2.5 PSI and will fill even the largest tubes. This is a must have on any boat.

**COMPACT INFLATOR/DEFLATOR 12 VOLT AND 110 VOLT**

Being able to inflate and deflate tubes in your boat is a huge benefit and convenience, and one of our excellent HO inflator/deflators will definitely improve your experience. These inflator/deflators are compact and powerful enough to quickly inflate all our tubes to the correct pressure. Both pumps include attachments for Boston and stem valves.

**LINK LANYARD**

Use HO Link Lanyards to connect any 2008 HO inflatable product to any other. Use the Link Lanyards to clip your towables to the Castaway Island or other anchored inflatable to turn them into more lounging space and to keep them securely out of the way of your other boating activities. HO Links are sold in a 3-pack with one each of 3, 5, and 10 foot lengths.

**SMART ANCHOR**

The HO Smart Anchor is a mushroom shape bag anchor. Fill it with rocks or sand and anchor large towables in up to 30 feet of water. Use the Smart Anchor to give your towables another life as floating islands. Then use the HO Link Lanyards (sold separately) to attach other inflatables around your new island and enjoy the HO Product Network! The Smart Anchor includes the reinforced anchor bag, variable length 30 foot anchor line, and attached floating rope collection bag to keep the excess rope safely out of the way.

**DUAL ACTION HAND PUMP**

Pumps air into the tube while pulling up or pushing down. Does it fast and gets the tube as firm as you want. The included attachments fit small stem valves, large stem valves, and Boston valves.

**TUBE TOTES**

HO Tube Totes give you the ability to easily transport and store your inflatable products. Simply lay the bag flat, throw the tube on, use the compacting straps and roll the tube up. This is a simple and clean way to make dealing with your inflatables hassle free.

Sizes: Small, Medium, Large

# A Accurate

L I N E S

## SYNDICATE KNOTLESS 11 SECTION MAIN LINE:

- Custom 11-section mainline including removable Switch section
- 80 strand pre-stretched rope exceeds AWSA standards for World Record capable tournaments
- No knots – each section is back braided so that no knots are needed
- ID-sleeves at each loop
- No removable sections – all loops are permanently connected so that changing the rope up is easy as pie

# ARS STORY

The ARS system is achieved through a unique method of stringing or tying the handle with the rope. In a conventional handle the rope is strung straight through the grommet of the handle, parallel to the ski rope. This allows the handle to pivot or roll easily, causing handle slippage, grip loss, and arm fatigue. With the Anti-Roll System, the ski rope is attached to the handle at two points with the brass grommets running perpendicular to the rope. With the ski rope tied to the handle at two points, handle roll is essentially non-existent. The patented ARS system reduces handle roll so much that the skier feels a more solid connection with the towboat.

## CUSTOM SLALOM SERIES

The handles of choice by 2 Time Pro Tour Champion Wade Cox, the Custom Slalom handle series just got better with a new rubber compound that's harder and stickier than before. By making the handle softer, the pressure in your palm is absorbed, alleviating fatigue and blistering. Painful blisters are caused by the chafing of overgripping the handle, and calluses are caused by moisture being wicked out of the palm due to the sheer pressure created against your hand. Softening the rubber eliminates both of these issues. Our new compound will be forgiving on your hands, thus allowing longer ski rides and fewer hot spots at the end of the day. Get a grip on one and you'll immediately notice the difference.

### CUSTOM ARS DYNEEMA:

- Exclusive rubber compound- easy on the hands, phenomenal grip
- Anti-Roll System (ARS) Feature
- Handles are strung with 100% ultra dyneema 16-strand Rope
- 12" & 13" Handle lengths in close tolerance diameters- .940", 1.062", 1.110"

### 41 TAIL CUSTOM SERIES HANDLE:

- Improved rubber – easy on the hands/phenomenal grip
- Thicker wall, super strong aluminum core
- Strung with AWSA approved rope, in a 4-way weave construction
- Exposed rope end caps – for easy wear inspection
- Available in .940" and 1.062" diameters – 12" and 13" lengths
- Handle of choice for world champion Will Asher

## LIMITED SERIES

### LIMITED ARS:

- Available in 12" & 13" or 13" ARC Team handle lengths
- 4-Way Weave Construction, double rope for additional added strength

### LIMITED HANDLES:

- Available in 12", 13" and 13" arc handle length
- Full length vinyl endcaps
- 4-Way weave construction

### LIMITED MAINLINES:

- 80 strand pre-stretched rope exceeds AWSA standards for World Record capable tournaments
- 70' 10-section slalom rope with ID-sleeves
- 70' 8-section slalom rope with ID-sleeves
- Detachable sections

## FREERIDE

## EXTREMESERIES

### 13" FREERIDE SLALOM HANDLE:

- Freeride your slalom ski in comfort without gloves
- Three ridge dual density EVA
- ARS endcaps
- Inlaid graphics
- Dyneema line

### EXTREME HANDLES:

- Available in 13" Team Handles
- 2-way weave with double rope end loop
- 4" vinyl endcaps and clear vinyl on the yoke for abrasion protection
- Available with an 8-section or 5-section mainline

### EXTREME MAINLINES:

- 70' 8-section slalom line with official colored sections
- 70' 5-section mainline

## RECREATIONALSERIES

### PERFORMANCE SERIES:

- Power Grip Handle- Tacky Team handle with strong aluminum alloy core
- Available with an 8-section or 5-section mainline
- 4" vinyl endcaps

### DOUBLE HANDLE:

- A BLAST FROM THE PAST-FOR THOSE WHO MUST HAVE THEM
- Available with 70' mainline in: Red, Blue or White

### RECREATIONAL MAINLINES:

- Exceeds AWSA rope requirements
- Great Value
- Colors: Purple, Red, Multicolored, Blue

## UNIVERSALSERIES

### MOLDED EVA HANDLES:

- 13" Molded EVA Handle grip, aluminum core
- 4mm thick EVA grip
- Poly "E" 12-strand rope, exceeds AWSA standards
- 4" vinyl end caps to protect your fingers
- Includes a 70' Recreational Slalom Rope
- Colors: Blue/Yellow, Black/White, Silver/Red

### RUBBER TEAM HANDLES:

- 12" smooth tacky rubber handle
- Comfortable grip, with excellent durability
- Exceeds AWSA rope requirements
- Offered in 75', 100' Lengths, and available in a 3-section ski rope
- Assorted Colors: White/Red/Blue, Red/White, Blue/Silver/Red, Black/Yellow/Blue

## DEEP-VSERIES

### ELITE SERIES:

- Super tacky 15" rubber grip, aluminum core handle
- Makes deep-water starts a snap
- Available with an Extreme 5-Section or 70' Recreational Mainline
- Handle Colors: Blue, Yellow, Silver

### UNIVERSAL SERIES DEEP-V

- 12" Rubber grip, aluminum core
- Makes deep-water starts a snap
- Dual Foam floats with an extra long "V" bridle
- Includes a 70' Universal Slalom Water Ski Rope
- Three assorted colors: Blue, Red, Black

## TUBEROPE

### 2K 60 FT. DELUXE TUBE ROPE:

- 2,375 lbs. average tensile strength
- 60' poly-e rope with float
- For towing up to a maximum of two people or 340 pounds

### 4K 60 FT. MULTI RIDER TUBE ROPE:

- 4,100 lbs. average tensile strength
- 60' heavy-duty multi-rider tube rope
- For towing up to a maximum of four people or 680 pounds

### 6K 60 FT. MULTI RIDER TUBE ROPE:

- 6,000 lbs. average tensile strength
- 60' heavy duty multi-rider tube rope
- For towing up to a maximum of six people or 1020 pounds

### TUBE CADDIE:

THE ONLY WAY TO CARRY YOUR INFLATED TUBE ACROSS THE LAKE, OR IF YOU JUST NEED EXTRA SPACE IN YOUR BOAT

- Two: 3" suction cups & snap hooks
- 1.5" Nylon webbing, that extends to over 28" long
- Lightweight, side release buckles
- Tested at speeds over 45 mph, only using suction cups

## GLOVES

### PRO GRIP:

A great basic glove with features like Amara palm, neoprene back hand panel, and reinforced adjustable wrist strap.

Sizes: XS-XXL

### WORLD CUP:

Pre-curved side panels on the fingers, this material is elastic yet more durable than previous materials. Full neoprene back hand panel, double padded Amara palm, webbing back hand strap and great looking new flexible logo patches. This glove makes for a great cold weather ski glove, as well as a summer glove.

Sizes: XS-XL

### WORLD CUP 3/4:

3/4 length pre-curved side panels on the fingers, this material is elastic yet more durable than previous materials. Full neoprene back hand panel, double padded Amara palm, webbing back hand strap and great looking flexible logo patches. This glove makes for a great cold weather ski glove, as well as a summer glove.

Sizes: XS-XL

## BOAT BUMPERS

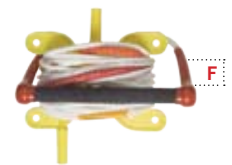

These inflatable bumpers are going to revolutionize boat bumpers as we know them. Simply pull the plug on the bottom to release the air and they flatten to the size of a pancake.

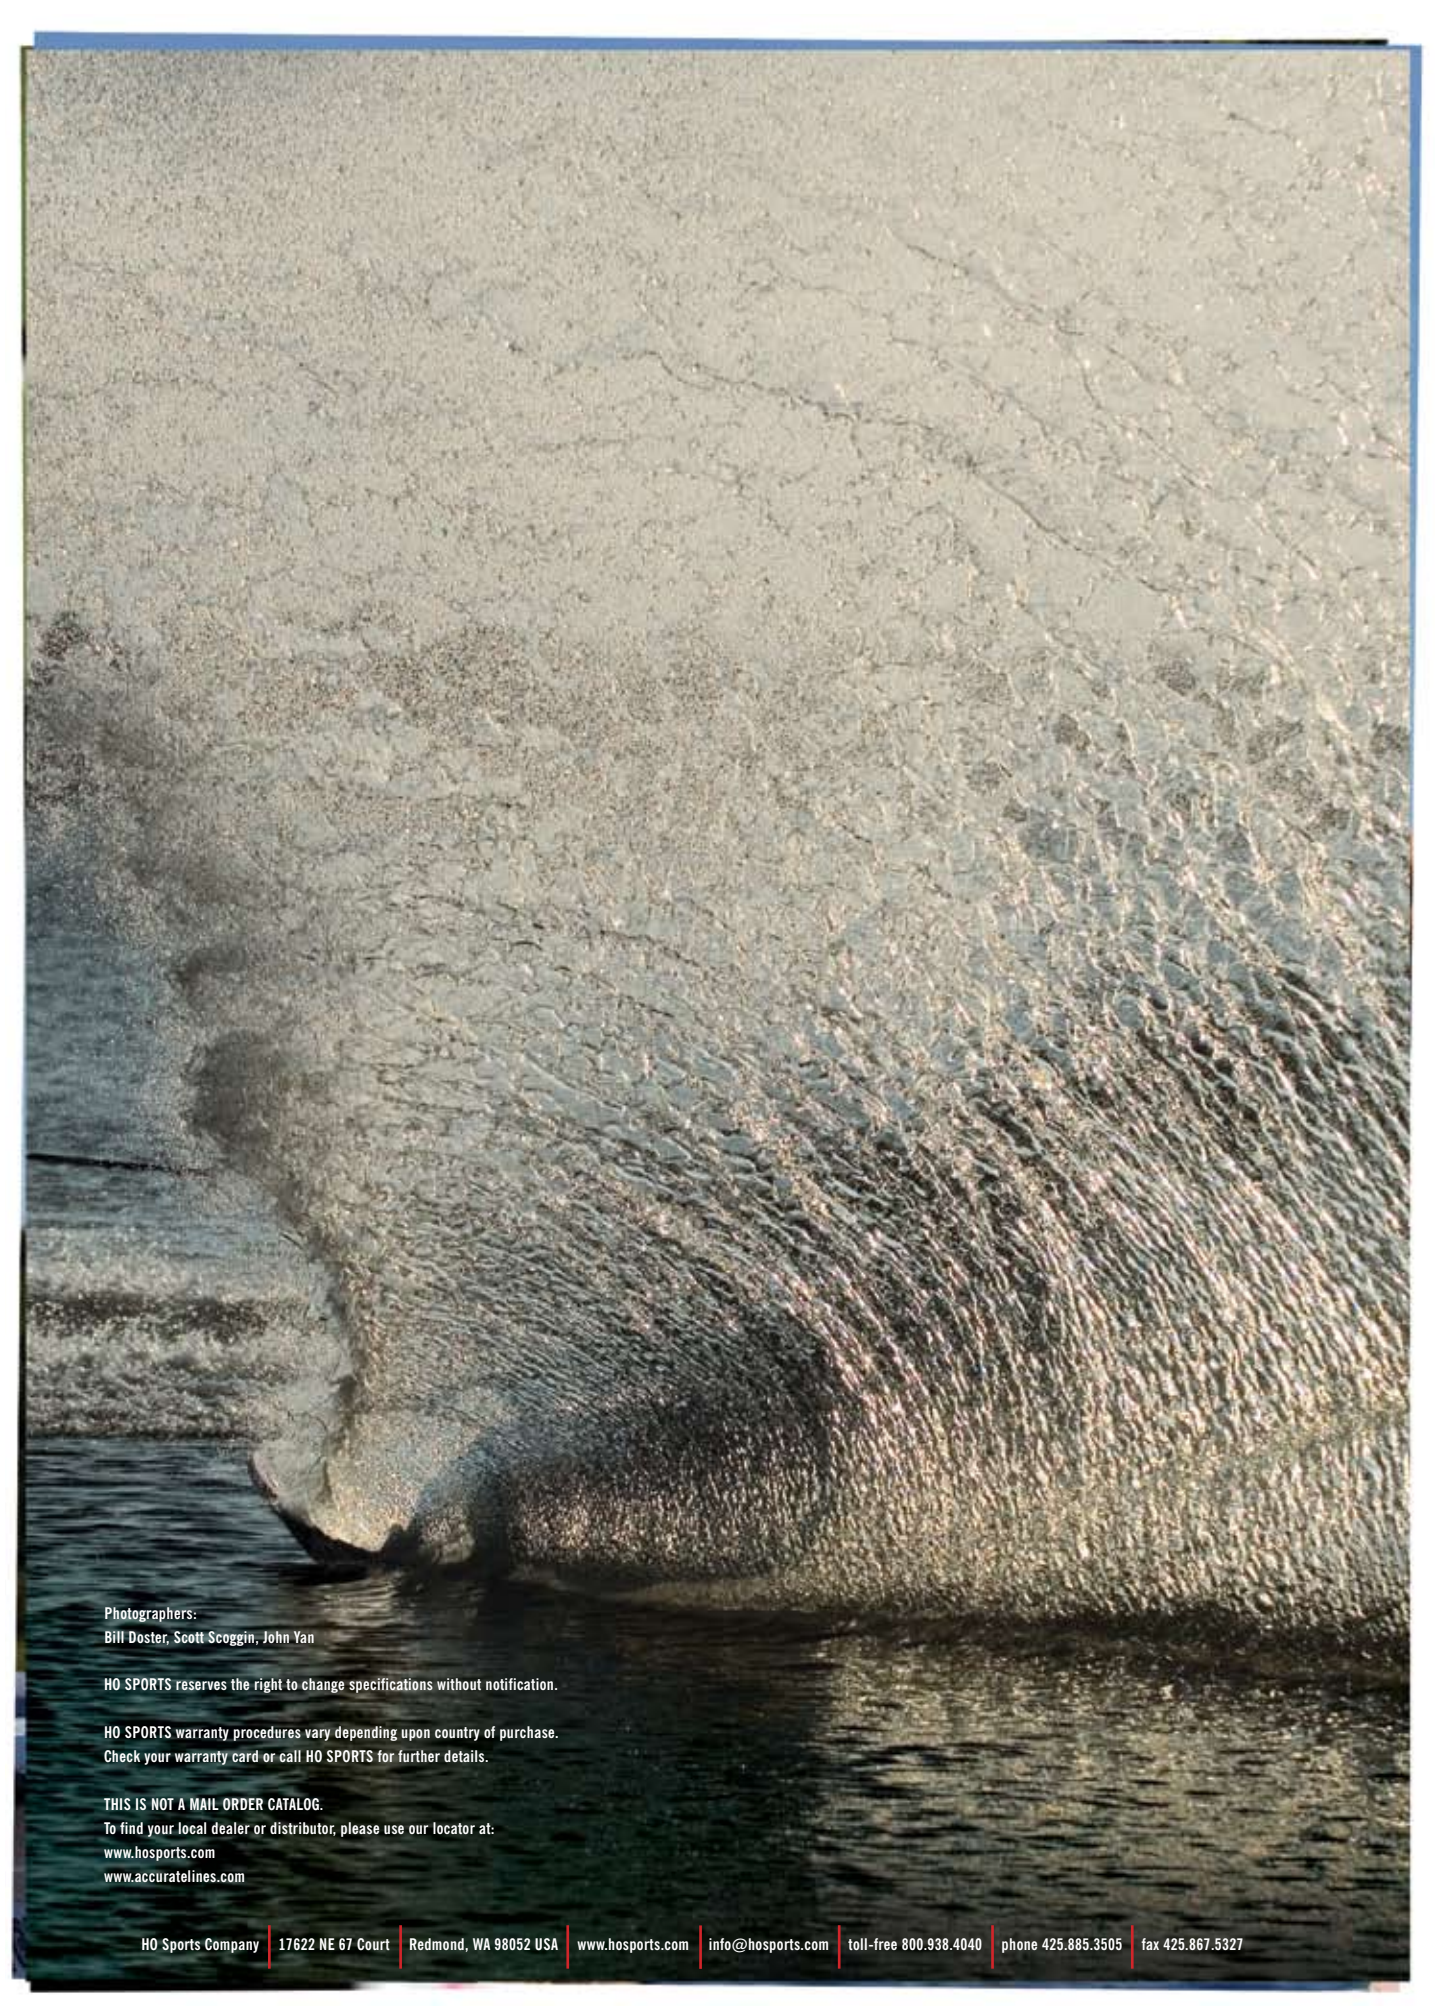

AVAILABLE IN BLACK OR BLUE CANVAS

- Small 6" x 18" • Medium 7.5" x 22.5" • Large 9" x 27"

## ACCESSORIES

- A: skier down flag
- B: 5' dog leash
- C: 4', 5' & 6' rope bungee dock ties
- D: boat tow harness
- E: 4', 5' & 6' webbing bungee dock ties
- F: line winder
- G: trialer boat guides
