**SNOWBOARD COLLECTION**  
**NS FACTORY BUILT, DENVER COLORADO**

## SELECTION CHART

PIPE & PARK / FREESTYLE / FREERIDE / BIG MOUNTAIN

THE FIRST, THE BEST, THE...

*Award Winning*

**ROCKER  
&  
CAMBER!**

*R.C. Technology (pat.pend.)*

and **VARIO POWER GRIP sidecut**

Rocker adds fun, camber delivers high speed stability.

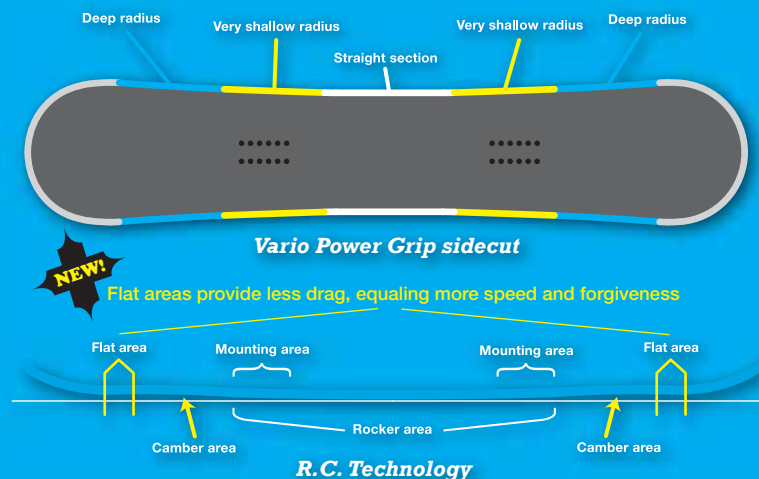

*The best of both worlds.*

# UNDENIABLE.

**ROCKER & CAMBER  
TECHNOLOGY IS THE  
FUTURE OF HIGH  
PERFORMANCE  
SNOWBOARDS.**

Never Summer's rocker designed lineup featuring R.C. (rocker & camber) Technology and Vario Power Grip sidecut geometry combines a rocker freestyle feel with all mountain high speed performance. Unlike older generation rocker and flat camber designs that may perform well in powder and parks but lack stability and edgehold when riding fast, our combined rocker and camber (R.C. Technology) design destroys anything in its path from parks to steeps, to powder and high speed cruisers. This technology blends a NS custom rocker profile with separate camber areas at each end of the board, providing unmatched power and snap out of turns. This also provides better board tracking for high speed stability and massive ollies. The Vario Power Grip sidecut works perfectly with this new design by adding increased edgehold precisely where it's needed most; from 2 inches outside of each binding, inward towards the center of the board providing added control and response in any condition.

## QUALITY, HAND-CRAFTED SNOWBOARDS SINCE 1991

Never Summer's reputation of quality and durability began in the early years of snowboarding. Designing and building snowboards since 1983 has given us years of experience in testing and perfecting our snowboard designs and construction methods. We continue to work very closely with the world's leading raw materials manufacturers and engineers to make sure every Never Summer snowboard is the most durable, high performance board on the planet! Each snowboard is carefully handcrafted in

our Denver, Colorado factory to precision tolerances. As a result, only the world's best snowboard shops proudly sell our products. Focusing less on excessive promotion and hype, and more on using the highest quality materials, craftsmanship and customer service has made Never Summer the world's premier independent snowboard company.

—Tracey and Tim Canaday

# MATERIALS

# AND CONSTRUCTION

## NS Custom Flightcore

Never Summer's exclusive CUSTOM FLIGHT CORE is the most technically advanced core system we've ever used. Designed and built in NS's woodcore facility, these cores fuse premium hardwood and ultra light softwood laminates together with vertical layers of elastomeric vibration dampers. These lightweight perimeter dampers actually increase vibration absorption the faster you ride while maintaining an incredible amount of snap and liveliness, providing a level of edgehold and high speed performance that only a Never Summer snowboard can deliver.

## Press Flex Core

This rocker core design is perfect for the Evo and Revolver models. This core features 2 specific softer flex points between the feet creating better hinge points for ultimate pressing and ollie performance.

## NS SuperLight Wood Core

Designed specifically for our new Carbonium series, this core blends ultralight wood with durable hardwood for unmatched strength to weight ratio.

## RDS 1 Damping System

This is our most extensive damping system specifically designed for the Premier F1 and Lotus. Three full perimeter layers of elastomeric rubber foil are laminated between the metal edge, fiberglass and wood core. This provides unmatched stability and a smooth riding feel especially at high speeds.

## RDS 2 Damping System

This lightweight system uses three narrower laminated damping layers that provide the perfect combination of vibration absorption and stability. RDS 2 is specifically designed for the SL, Legacy and Infinity.

## EDS Damping System

The EVO DAMPING SYSTEM (EDS) delivers increased edgehold and high speed stability without compromising the Evo and Revolver's freestyle performance.

## Durasurf Sintered 4501 base

Crown Plastics has been the industry leader in sintered materials for over 35 years and has created the DURASURF 4501 sintered base exclusively for Never Summer. This new high density base is extremely fast and will provide unmatched performance and durability.

### DAMPNESS & FLEX METERS

**Dampness:** 10 is very damp (more stable and smooth riding at high speeds), 1 is least damp (more snappy and lively underfoot) **Flex:** 10 is stiffer in flex (better for high speed freestyle and freeriding, better for bigger riders), 1 is softer in flex (better for presses, butters, more forgiving).

## STS Pretensioned Fiberglass

The world's best snowboard fiberglass, period. Our STS ADVANCED fiberglass is a pre-hardened, pre-tensioned, layered laminate that has added elastomer stringers between the 0 degree and 90 degree glass fibers the length of the effective edge. This produces a stronger bond between the individual glass laminates giving our snowboard unmatched strength, edge hold and performance.

## BI-Lite Fiberglass

BI-Lite fiberglass combines many of the strength characteristics of STS ADVANCED fiberglass with an ultralight glass fiber matrix. This delivers incredible freestyle and freeride performance without sacrificing durability.

## Carbon V-Twin Laminate Technology

The Premier F1 and Lotus benefit most from the CARBON V-Twin laminate system which extends the carbon "V"s from the bindings to the ends of the effective edge increasing power and edge response. An additional carbon V is added to the tail to increase edge hold and power out of turns.

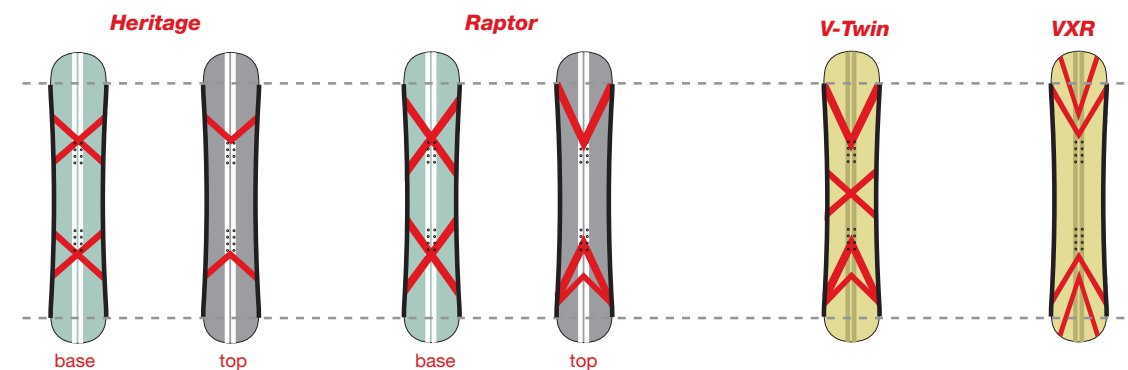

## Carbonium Laminate Technology

More carbon equals more power and performance. The new Carbonium Laminate Technology combines an advanced top and base carbon matrix to maximize torsional response and strength where it's needed most. The result is a lightweight yet powerful design that will keep the Raptor and Heritage going strong for years.

## Carbon VXR Laminate Technology

The CARBON VXR system is specifically designed for our SL, Legacy, Evo, Revolver and Infinity freestyle snowboards. The carbon "V"s are set back even further from the tip and tail to increase power and stiffness from the bindings to the edge. This system also helps soften the tip and tail just enough to help you dominate any terrain park or kicker that crosses your path. An additional smaller carbon "V" gives these boards insane pop.

## Carbonium Laminate Technology

## Sintered P-tex Sidewall

We were the first snowboard company to use and perfect SINTERED P-TEX SIDEWALLS, and we've never seen one crack. Unlike conventional ABS sidewalls, that have a tendency to crack in colder temperatures, SINTERED P-TEX SIDEWALLS maintain their integrity at any temperature.

## CDS Damping System

The CARBONIUM DAMPING SYSTEM (CDS) greatly reduces vibration and provides unmatched high speed stability and control. Thin elastomeric rubber stringers reduce vibration from the metal edge and surrounding laminates. Stringers below the inserts and under the carbon dampen any additional vibration near the bindings, giving the Raptor and Heritage a smooth riding feel underfoot without sacrificing snap and power throughout the board.

## Durasurf XT Sintered 5501 base

Crown Plastics has developed an exclusive, super fast, durable sintered base specifically for the Raptor and Heritage. Just the right amount of graphite has been added making the DURASURF 5501 XT base the fastest we've ever used.

# Carbonium

*Unmatched freeride and freecarve*

**NEW!**

## RAPTOR & RAPTOR X

*type: high-performance freeride/freecarve*

### RAPTOR

Sleek design and graphics inspired by the F/A-22 fighter jet, the Raptor is our flagship high-performance freeride/freecarve snowboard. We've taken our legendary Titan freeride model to a new level in carving, stability and all mountain versatility by reinforcing the new NS SuperLight wood core with our new extensive Carbonium Laminate Technology. The result is a lightweight ultimate freeride weapon that has unmatched power and response. We've also created a new directional Rocker/Camber profile specifically for the Raptor

that combines a longer front camber and rear shifted rocker which increases carving performance, high speed stability and powder floatation. The Carbonium Damping System (CDS) eliminates excess vibration, and the lightweight super-durable Carbonium topsheet sets this board apart from all others.

### RAPTOR X

## HERITAGE & HERITAGE X

type: big mountain freestyle

### HERITAGE

Like the freeride inspired Raptor, the new Carbonium Series Heritage is equipped with the new NS SuperLight woodcore and extensive carbon reinforcement (Carbonium Laminate Technology) to power this big mountain freestyle board anywhere on the mountain. Super snappy, yet powerful and lightweight, the Heritage is comfortable charging full speed

down groomers, in the trees, or slaying the park with absolutely no sacrifice in quality and durability. This is a truly versatile all mountain freestyle machine! Equipped with improved Carbonium topsheet.

# PREMIER F1 *type: freeride*

Our high performance Premier F1 takes freeride technology to a whole new level! The Carbon V-Twin Laminate Technology and custom F1 Elastomeric Stabilizers underfoot increase edgehold and vibration absorption in any snow condition. With the NS freeride technology, the Premier F1 will power through anything in its path keeping you on edge and in complete control at any speed. The modified NS Custom Flightcore also incorporates a multi-flex profile giving the Premier a powerful tail flex and a more responsive mid flex. For unmatched carving ability, powder floatation and effortless turn initiation, the F1 has arrived.

# LEGACY *type: mid-wide all mountain freestyle*

A wider version of the SL, this deck dominates every part of the mountain from parks, to pow, to steeps. Its width eliminates most toe and heel drag, but is narrow enough to be quick and responsive. A deeper sidecut, the Carbon VXR and powerful flex make it the most versatile, high-performance mid-wide board we've ever built! 'Nuff said.

PIPE & PARK / FREESTYLE / FREERIDE / BIG MOUNTAIN

 Full Wrap Metal Edge

# SL *type: all mountain freestyle*

An extremely agile, high performance freestyle board that does it all, the SL is not only versatile, but offers powerful edge to edge response and maintains a forgiving tip and tail. If you want a board that excels in the park, on groomers, or on backcountry kickers, this is it.

PIPE & PARK / FREESTYLE / FREERIDE / BIG MOUNTAIN

# EVO *type: freestyle/pipe & park*

Designed for advanced freestyle riders, the twin tip Evo is the perfect board for shredders who spend most of their time in the pipe and park. Extremely light and easy to butter, the Evo provides high speed stability and durability not usually associated with freestyle snowboards.

PIPE & PARK / FREESTYLE / FREERIDE / BIG MOUNTAIN

# LOTUS

type: women's freeride

The women's version of the Premier F1, the Lotus features a softer flex and narrower shape. The Carbon V-Twin Laminate Technology and custom F1 Elastomeric Stabilizers underfoot increase edgehold and vibration absorption in any snow condition. The incorporated NS Custom Flightcore also provides a multi-flex profile giving the Lotus a powerful tail flex and a more responsive mid flex for unmatched carving ability and effortless turn initiation. This powder dominating deck also utilizes our Vario sidecut greatly enhancing the Lotus' high speed edgehold.
