FLUX BINDINGS 2014-2015

Since 1992 FLUX has been specifically dedicated to making the best bindings possible.

For the last 22 years, we have been the leaders in binding innovation.

For our 2014/2015 season we continue to give you
a seamless connection to the snow under your feet.

With new and updated features, we continue to push the limits on fit,
quality and performance. With a lifetime warranty on all new baseplates,

we are sure our bindings will handle anything that you can.

Fit. Durability. Comfort.

Promised.

The logo consists of a stylized circular icon to the left of the word "FLUX" in a bold, sans-serif font. The icon is a circle with a curved arrow pointing clockwise, suggesting motion or a binding mechanism.

UU Fit System

Flux UU Fit System gives you a comfortable 360 degree wrap which evens out pressure and gives you a more natural feel and hold in your binding.

UU Fit System

Traditional mount

A traditional ankle strap mounting point creates pressure points in the front and back and gives a weak hold from all sides. Leaving gaps and not giving you a natural hold.

Strong

Weak

NEW F.T.M. Versa

New toe mask made from a softer material for a better hold. Simple yet stylish design with our L-Guide system to hold your ladders down. 2 way fit, wear it on top of your toes or use it to mask your toes. Compatible with all boots.

F.T.M.
versa

NEW

NEW SOLID Urethane Highback

For RK

New solid urethane high back. New concept designed specifically for urethane. New flex pattern, lower half is stiffer and more responsive, and top half is more flexible. Gives you the feel of a no-back or low back without stressing the boot and ankle offering a skate like feel for everyone.

NEW

NEW Women's ULTIMA Winged Highback

For GS

Designed for a woman specifically, the high back sits lower than the men's models preventing calf bite. Does not get in the way of riding and gives maximum support. Provides more response when ollieing and a more stable landing. Good for beginners all the way to the girls that shred the park.

NEW

Low Profile Ratchet Design

Low Profile Ratchet Design. Our ratchet buckles are designed and engineered different than others. Offers smooth ratcheting without slipping and without damaging the materials.

ULTIMA Baseplate

Custom stabilizers (DM/SF/DL/DS)

The Ultima Base utilizes custom stabilizers. For the DM and SF they are made of a hard density material. For the DL and DS they are made of a soft density material. You can also remove them for a more playful ride.

DM/SF(Hard)

DL/DS(Soft)

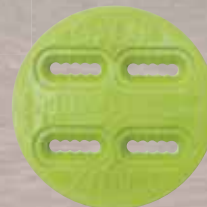

Hybrid Foodbed (DM/SF/DL/DS)

The Ultima Base Hybrid Foodbed. Softer EVA on the inside and harder EVA on the outside. Even more harder edge sensors that provide better toe edge response. Deck sensors that give a canted feel and more leverage for presses and landings.

NEW URETHANE DISK

URETHANE DISK. We designed a mounting disk using the proven material we use in our high back for the RK. The disk will flex 360 degrees and will give you a more natural feel when riding. This disk allows your board to flex naturally without affecting board torsion.
