PIPE & PARK / FREESTYLE / FREERIDE / BIG MOUNTAIN

THE ORIGINAL, AWARD WINNING

ROCKER & CAMBER!

R.C. Technology

and VARIO POWER GRIP sidecut

ROCKER ADDS FUN, CAMBER DELIVERS HIGH SPEED STABILITY.

The best of both worlds.

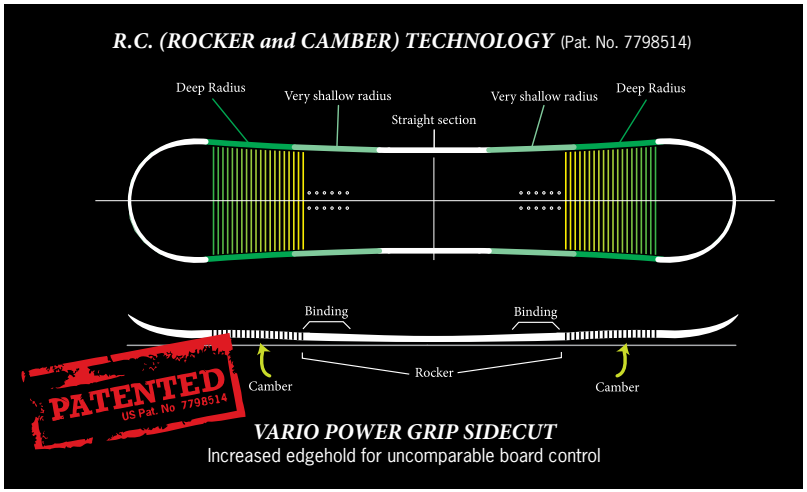

ROCKER & CAMBER TECH IS THE FUTURE OF HIGH PERFORMANCE SNOWBOARDS!

Never Summer's patented rocker designed lineup featuring R.C. (Rocker & Camber) Technology and Vario Power Grip sidecut geometry combines a rocker freestyle feel with all mountain high speed performance. Unlike older generation rocker and flat camber designs that may perform well in powder and parks but lack stability and edgehold when riding fast, our combined rocker and camber (R.C. Technology) design destroys anything in its path from parks to steeps, to powder and high speed cruisers. This technology blends a NS custom rocker profile with separate camber areas at each end of the board, providing unmatched power and snap out of turns. This also provides better board tracking for high speed stability and massive ollies. The Vario Power Grip sidecut works perfectly with this new design by adding increased edgehold precisely where it's needed most; from 2 inches outside of each binding, inward towards the center of the board providing added control and response in any condition.

QUALITY, HAND-CRAFTED SNOWBOARDS SINCE 1991

Never Summer's reputation of quality and durability began in the early years of snowboarding. Designing and building snowboards since 1983 has given us years of experience in testing and perfecting our snowboard designs and construction methods. We continue to work very closely with the world's leading raw materials manufacturers and engineers to make sure every Never Summer snowboard is the most durable, high performance board on the planet! Each snowboard is carefully handcrafted in our Denver, Colorado factory to precision tolerances. As a result, only the world's best snowboard shops proudly sell our products. Focusing less on excessive promotion and hype, and more on using the highest quality materials, craftsmanship and customer service has made Never Summer the world's premier independent snowboard company.

—Tracey and Tim Canaday

MATERIALS + CONSTRUCTION

NS CUSTOM FLIGHTCORE
Never Summer's exclusive CUSTOM FLIGHT CORE is the most technically advanced core system we've ever used. Designed and built in NS's wood-core facility, these cores fuse premium hardwood and ultra light softwood laminates together with vertical layers of elastomeric vibration dampers. These lightweight perimeter dampers actually increase vibration absorption the faster you ride while maintaining an incredible amount of snap and liveliness, providing a level of edgehold and high speed performance that only a Never Summer snowboard can deliver.

PRESS FLEX CORE
This rocker core design is perfect for the Evo and Revolver models. This core features 2 specific softer flex points between the feet creating better hinge points for ultimate pressing and ollie performance.

NS SUPERLIGHT WOOD CORE
Taking our custom flight core even further, we've designed the SUPERLIGHT WOOD CORE specifically for our new Carbonium series. This core blends extremely light wood with durable hardwood for unmatched strength to weight ratio.

RDS 1 DAMPING SYSTEM
This is our most extensive damping system specifically designed for the Premier F1 and Lotus. Three full perimeter layers of elastomeric rubber foil are laminated between the metal edge, fiberglass and wood core. This provides unmatched stability and a smooth riding feel especially at high speeds.

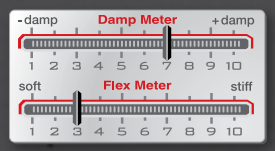

RDS 2 DAMPING SYSTEM
This lightweight system uses three narrower laminated damping layers that provide the perfect combination of vibration absorption and stability. RDS 2 is specifically designed for the SL, Legacy and Infinity.

EDS DAMPING SYSTEM
The EVO DAMPING SYSTEM (EDS) delivers increased edgehold and high speed stability without compromising the Evo and Revolver's freestyle performance.

DURASURF SINTERED 4501 BASE
Crown Plastics has been the industry leader in sintered materials for over 35 years and has created the DURASURF 4501 sintered base exclusively for Never Summer. This new high density base is extremely fast and will provide unmatched performance and durability.

DAMPNESS & FLEX METERS
Dampness: 10 is very damp (more stable and smooth riding at high speeds), 1 is least damp (more snappy and lively underfoot) Flex: 10 is stiffer in flex (better for high speed freestyle and freeriding, better for bigger riders), 1 is softer in flex (better for presses, butters, more forgiving)

Example:

DRC DIRECTIONAL ROCKER/CAMBER PROFILE
DRC is designed to enhance edge hold and stability while maintaining powder floatation. This is accomplished by extending the camber to the end of the effective edge in the tip, increasing pressure over this area. To compensate for this additional pressure, we've shifted the rocker toward the tail making for unmatched carving at high speeds and a more forgiving ride.

BI-LITE FIBERGLASS
BI-LITE fiberglass combines many of the strength characteristics of STS ADVANCED fiberglass with an ultra light glass fiber matrix. This delivers incredible freestyle and freeride performance without sacrificing durability.

CARBON V-TWIN LAMINATE TECHNOLOGY
The Premier F1 and Lotus benefit most from the CARBON V-Twin laminate system which extends the carbon "V"s from the bindings to the ends of the effective edge increasing power and edge response. An additional carbon V is added to the tail to increase edge hold and power out of turns.

CARBONIUM LAMINATE TECHNOLOGY
More carbon equals more power and performance. The new Carbonium Laminate Technology combines an advanced top and base carbon matrix to maximize torsional response and strength where it's needed most. The result is a lightweight yet powerful design that will keep the Raptor and Heritage going strong for years.

CARBON VXR LAMINATE TECHNOLOGY
The CARBON VXR system is specifically designed for our SL, Legacy, Evo, Revolver and Infinity freestyle snowboards. Dual carbon v's help transfer more energy to the end of the effective edge, tip and tail without making these boards too stiff for buttering and presses. This is the most versatile Carbon system for those that prefer a freestyle feel to their board whether in the park or freeriding the mountain.

CARBONIUM TOPSHEET
A very durable, scratch and chip resistant material with a high tech carbon fiber like visual. This textured material also provides more grip than a gloss topsheet, working as a built in stomp pad.

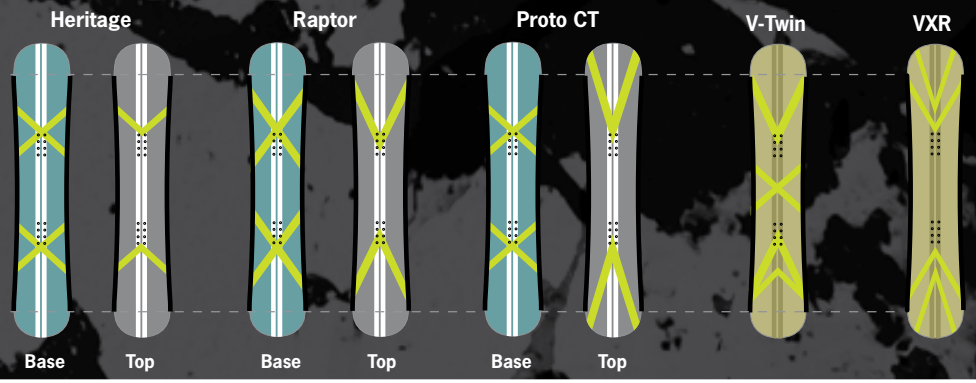

SINTERED P-TEX SIDEWALL
We were the first snowboard company to use and perfect SINTERED P-TEX SIDEWALLS, and we've never seen one crack. Unlike conventional ABS sidewalls, that have a tendency to crack in colder temperatures, SINTERED P-TEX SIDEWALLS maintain their integrity at any temperature.

STS PRETENSIONED FIBERGLASS
The world's best snowboard fiberglass, period. Our STS ADVANCED fiberglass is a pre-hardened, pre-tensioned, layered laminate that has added elastomer stringers between the 0 degree and 90 degree glass fibers the length of the effective edge. This produces a stronger bond between the individual glass laminates giving our snowboard unmatched strength, edge hold and performance.

CDS DAMPING SYSTEM
The CARBONIUM DAMPING SYSTEM (CDS) greatly reduces vibration and provides unmatched high speed stability and control. Thin elastomeric rubber stringers reduce vibration from the metal edge and surrounding laminates. Stringers below the inserts and under the carbon dampen any additional vibration near the bindings, giving the Raptor and Heritage a smooth riding feel underfoot without sacrificing snap and power throughout the board.

DURASURF XT SINTERED 5501 BASE
Crown Plastics has developed an exclusive, super fast, durable sintered base specifically for the Raptor and Heritage. Just the right amount of graphite has been added making the DURASURF 5501 XT base the fastest we've ever used.

DESCRIPTION: CARBONIUM LAMINATE TECHNOLOGY (CLT)

Carbonium Series

RAPTOR/RAPTOR X

***Type:** High-performance freeride/freecarve*

RAPTOR: Sleek design and graphics inspired by the F/A-22 fighter jet, the Raptor is our flagship high-performance freeride/freecarve snowboard. We've taken our legendary Titan freeride model to a new level in carving, stability and all mountain versatility by reinforcing the new NS SuperLight wood core with our new extensive Carbonium Laminate Technology (CLT). The result is a lightweight ultimate freeride weapon that has unmatched power and response. We've also created a new directional Rocker/Camber profile specifically for the Raptor that combines a longer front camber and rear shifted rocker which increases carving performance, high speed stability and powder floatation. The Carbonium Damping System (CDS) eliminates excess vibration, and the lightweight super-durable Carbonium topsheet sets this board apart from all others.

HERITAGE/HERITAGE X

Type: *Big mountain freestyle*

HERITAGE: Like the freeride inspired Raptor, the new Carbonium Series Heritage is equipped with the new NS SuperLight woodcore and extensive carbon reinforcement (Carbonium Laminate Technology) to power this big mountain freestyle board anywhere on the mountain. Super snappy, yet powerful and lightweight, the Heritage is comfortable charging full speed down groomers, in the trees, or slaying the park with absolutely no sacrifice in quality and durability.

HERITAGE X: A wide version of the original.

Carbonium Series

PROTO CT/PROTO CTX

Type: *All mountain freestyle*

PROTO: For the new 2011/12 Proto CT (Carbonium Twin), we've taken the powerful flex of the time tested SL, and blended it with the responsive damping of the Evo to create the ultimate all mountain true twin. This board has the versatility of Never Summers patented Rocker Camber Technology, our new Superlight wood core, graphite impregnated Sintered 5501 base and added a whole new element into the proven Never Summer Carbonium Series of boards. Our new blunted, true twin shape cuts down material on tip and tail for a reduced, more balanced swing weight, while increasing effective edge for on snow stability. The Carbonium Proto CT is the future.

PREMIER F1

Type: Freeride

Our high performance Premier F1 takes freeride technology to a whole new level! The Carbon V-Twin Laminate Technology and custom F1 Elastomeric Stabilizers underfoot increase edgehold and vibration absorption in any snow condition. With the NS freeride technology, the Premier F1 will power through anything in its path keeping you on edge and in complete control at any speed. The modified NS Custom Flightcore also incorporates a multi-flex profile giving the Premier a powerful tail flex and a more responsive mid flex. For unmatched carving ability, powder floatation and effortless turn initiation, the F1 has arrived.

LEGACY

Type: Mid-wide all mountain freestyle

A wider version of the SL, this deck dominates every part of the mountain from parks, to pow, to steeps. Its width eliminates most toe and heel drag, but is narrow enough to be quick and responsive. A deeper sidecut, the Carbon VXR and powerful flex make it the most versatile, high-performance mid-wide board we've ever built!

SL

Type: All mountain freestyle

This all terrain, all condition ride is our most popular and versatile model. For 2011/12 we have modified our Custom Flight Core to reduce weight and increase pop. We've also added the Carbon VXR Laminate Technology to the SL adding powerful edge response and control. The lightweight RDS 2 Damping System provides the perfect balance of freeride vibration absorption and freestyle liveliness. Slightly setback for powder floatation but centered enough for spinning and carving, this one board quiver excels on hardpack, in the park, natural features and all around freeriding. Handcrafted in Denver, Colorado, the SL has once again set the standard for all mountain freestyle performance, versatility and durability.

Lengths and blunt shapes!

EVO

Type: Freestyle/pipe and park

Designed for optimum freestyle control, our new true twin blunt shape reduces material for a lower, more balanced swing weight while extending effective edge for more stability on takeoff and landing. The Evo features our Press Flex Core allowing riders to easily manipulate the board for a buttery fun and playful ride. Carbon VXR Laminate Technology extends carbon to the ends of the board for maximum pop and boost. Our EDS dampening system provides high-speed stability not usually found in a park/pipe board, while maintaining a light and lively ride.

SUMMIT/SUMMIT SPLIT

Type: Classic powder/freeride

The Summit's supreme powder performance is a culmination of directional flex, tapered shape, custom tip/tail profile and extensive damping. The Summit will power through the deepest snow, crud, tight trees or anything else that gets in its way. **Summit Custom Split:** With a 1.625" set back, tapered shape and Rocker/Camber profile the Summit Custom Split is the ultimate deep powder surfer. Extensive carbon V's provide power and stability for mowing through chop, while still giving the board a softer overall flex for adjusting to contours in the snow. Vario Power Grip sidecut makes the Summit less condition specific for excellent edge hold on hardpack. Our RC design keeps the board on top of the snow breaking new skin track, while providing less drag for traversing ridgelines. The Summit is a timeless shape with nimble response and legendary durability making it a solid investment for the first time splitboarder or longtime backcountry enthusiast.

HELMETS

A Bern and Never Summer Industries collaboration

WATTS VISOR

The successor to Bern's original visor lid, the Watts combines a visor with top and back vents to provide a balance of airflow and style. Sun, rain and snow, you name it, the Watts defends against it.

+ Ultra thin ABS shell specifically engineered for EPS foam
+ Expanded polystyrene hard foam interior for high-impact protection
+ Sizes: S-XL
+ Weight: 20 oz.

MACON

The Macon helmet was developed with top skaters, snowboarders and underground rippers in mind. A core, high quality, subtle helmet that performs as both a skate and snow model.

+ Ultra thin ABS shell specifically engineered for EPS foam
+ Sizes: S-XL
+ Weight: 19.1 oz.
